

SEAMLESS CONSTRUCTION

Prevents splitting
Retains "Sphericity"

TWO WEIGHTS

Standard for normal operations
Heavy for high turbulence applications.

THREE DUROMETERS

50 Series (55 durometer) Yellow
60 series (65 durometer) Green
70 series (75 durometer) Red

LOW FRICTION

For applications with very little lubricity, a low friction sphere would be recommended.

ACCESSORIES

Inflation pumps
Filler adapters
Valve wrenches
Sizing rings
Core extractors
Sphere suction removal kits

Utilizing

TODAY'S TECHNOLOGY TO

revolutionize

MEASUREMENT
MAINTENANCE
PROGRAMS

Our *Uni* Cast Sphere is a one piece, seamless meter proving and pipe line sphere.

SEAMLESS CONSTRUCTION

The seamless exterior of Meter Engineer's Sphere is molded into one continuous shell of polyurethane that prevents splitting and retains its "Sphericity." While other two-piece meter prover spheres can inflate into an egg-shape, our one piece construction helps the sphere to maintain a truer diameter, giving a more accurate measurement.

TWO WEIGHTS

The *MEI* Sphere comes in two weights, Standard and Heavy. The Standard weight Sphere is ideal for normal operations while the Heavy weight Sphere should be utilized in high turbulence applications.

DIAMETERS & DUROMETERS

We manufacture the Sphere in three durometers and multiple diameters to fit any application.

Please contact our office for specific size availability at (316) 721-4214.

50 Series (55 durometer) Yellow

60 series (60 durometer) Green

70 series (75 durometer) Red

LOW FRICTION

A low friction option is available for applications with very little lubricity.

ACCESSORIES

We have many accessories available to make your *Uni* Cast Sphere perform flawlessly.

- Inflation pumps
- Filler adapters
- Valve wrenches
- Sizing rings
- Core extractors
- Sphere suction removal kits

For pricing and application recommendations, please contact our office at (316) 721-4214.
